Thomas J. Brown, CEO
Living Shoreline Solutions, Inc.
12646 Grand Traverse Drive
Dade City, FL 33525

Dear Mr. Brown,

I have acquired your name from a local friend concerning your company products. I live in Cypremont Point. I am an avid fisherman watching the rapid erosion of Marsh Island, Shark Island and other local areas for years. I have sat on many committees for Coastal Erosion and Fish Conservation in the past. Therefore, I am very interested in watching the installation of the 3 different product solutions to erosion control that have been installed on Shark Island. I am most impressed with your product for several reasons. First, they appear to be more conducive to stopping the wind and wave action that occurs on the north side of Shark Island (3-6' seas typically). I believe in some of the severe weather conditions that Shark Island experiences, your product will perform very well. Secondly, your product provides a Fish Habitat, which is very important to the locals.

I have had the opportunity to take many of my friends and committee men to the site and they were very impressed with your work. We wish you the best and hope that Louisiana recognizes that not only does your product stop erosion, but also, provides very important secondary benefits to our community for future fishing.

Thanks again.
